## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13 and 19 are drawn to a decoder and processor, classified in class 375, subclass 240.25.
  - II. Claims 14-18 and 20-30, drawn to a inter-coded and intra coded video decoder and processor, classified in class 375, subclass 240.13.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I has separate utility such as ant decoder could be used and is not limited to an inter or intra frame decoder. Furthermore, the claims of group II further limit the invention to one containing a motion vector reconstructing circuit that is not claims in the group I set of claims. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
